Jakarta, Indonesia

## SUMMARY

---

Software Engineer with 4+ years of experience in software development, system architecture, and technical leadership. Experienced in leading end-to-end application development, designing scalable systems and RESTful APIs, establishing engineering standards, mentoring engineers, and translating business requirements into reliable technical solutions. Strong background in full stack development, system integration, microservices, performance optimization, and cross functional technical collaboration.

## EDUCATION BACKGROUND

---

### Brawijaya University, Malang

Computer science, Informatics Engineering (Bachelor's Degree) | GPA 3.26 / 4.00

## EXPERIENCE

---

### MANDIRI UTAMA FINANCE | Software Engineer (July 2025 – Present)

#### Frontend Engineering Standardization

- Develop and maintain standardized frontend templates based on company business and technical requirements
- Established standardized frontend architecture and development templates for all internal applications and projects
- Provided technical guidance to engineering teams IT Solution Division (6 Departments) adopting the standardized frontend architecture
- Researched and developed an internal React component/library ecosystem to improve development consistency and reusability

#### MUF Super Web App

- Led end-to-end development of MUF Super Web App feature, from requirement analysis to deployment
- Coordinated the integration of multiple mini applications within MUF Super App ecosystem
- Designed RESTful APIs and system architecture to support application features
- Implemented Role-Based Access Control for all MUF users (Head Office to Branch Office)

#### MASS Web App (Legacy Super App)

- Support and independently handle end to end development of legacy system enhancements
- Implemented Role Based Access Control for MASS App users
- Collaborated with infrastructure team to implement Datadog monitoring

#### Report AML

- Collaborate with cross multiple teams and mentor junior developers
- Analyzed business requirement and converted them into technical solutions
- Designed Data structure and RESTful API to meet business requirements
- Set up development and deployment environment

## NUSANTARA DUTA SOLUSINDO | Software Engineer (April 2022 – June 2025)

### Microservice Standardization

- Evaluated and implemented Java and Next.js version upgrades within the existing microservices architecture
- Develop reusable components based on business and technical requirements
- Set up deployment in internal server using Nginx and Ngrok

### AROA Bank SMBCI

- Translated Business Requirement Documents (BRD) into Functional Specification Documents (FSD) to define implementation requirements for development teams.
- Designed application UI flows and RESTful APIs based on business and functional requirements.
- Worked directly with clients on-site during Phase 2 SIT and UAT to discuss requirements, explain technical issues, and help resolve problems.
- Coordinated issue resolution and task assignments within a four-engineer team alongside the Technical Lead, providing technical guidance and mentoring while supporting the Project Manager.
- Resolved performance bottleneck to improve system scalability and API response time
- Introduced and implemented performance testing using JMeter
- Implemented caching strategy using Redis to improve performance
- Reproduced external penetration-test findings using Burp Suite with a teammate and collaborated with the development team on remediation

## TECHNICAL SKILLS

---

**Languages:** Java, JavaScript, TypeScript

**Backend:** Spring Boot, Node.js, Express.js, REST APIs

**Frontend:** React, Next.js

**Architecture & Integration** : Microservices, System Integration, RBAC, Kafka

**Database:** PostgreSQL, MySQL, Oracle, MongoDB, Redis, Elasticsearch

**DevOps & Infrastructure:** Docker, Jenkins, OpenShift (OCP), Nginx, CI/CD

**Testing & Security:** JMeter, Burp Suite

**System Analysis:** Requirement Analysis, API Design, System Design, UML, Business Process Modeling

## PERSONAL COMPETENCIES

---

- Leadership and technical decision-making
- Strong analytical and problem-solving
- Effective communication and stakeholder management
- Team collaboration and mentoring
- Business and commercial awareness
- Critical thinking and strategic planning
